EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicants, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

8. (Currently Amended) A method in an interactive response system comprising:
 - acquiring an utterance from a user;
 - recognizing a plurality of words from the utterance and associating a recognition score with each of the recognized words;
 - acquiring for each of the recognized words an actual duration of delivery and an ideal duration of delivery;
 - calculating for each of the recognized words a ratio of the actual duration and the ideal duration;
 - computing an average [ration] ratio for the utterance as an indication of a speed of delivery of the utterance, wherein the average ratio is equal to the average of the calculated ratios for each of the recognized words associated with a recognition score above a lower threshold recognition score; and
 - prompting the user as to the speed of delivery of the utterance according to the results of the computing step comparison.

Claim 8 is amended to correct a minor typographical error.

EXAMINER'S COMMENT RE DRAWINGS

Applicants have stated that a formal set of drawings were drafted and included as a replacement set of drawings in response to the drawing objections. However, no replacement drawings were found to accompany the amendment. Applicants may have inadvertently overlooked sending the drawings. In any event, to avoid abandonment of the application, Applicants should submit the formal drawings prior to payment of the issue fee.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or reasonably suggest utilizing an average ratio equal to an average of calculated ratios for each of the recognized words associated with a recognition score above a threshold recognition score to prompt a user to adjust a speed of delivery. *Thelen et al.* ('072) is the closest art of record, measuring a speech velocity by speech recognition, where the speech velocity is announced to the speaker, so that a warning is given if the velocity is out of range of speech recognition. However, *Thelen et al.* ('072) omits using words to determine an average speed only if a recognition score of a word is above a lower threshold recognition score. Applicants' Specification, ¶[0013], suggests an advantage of increasing reliability of calculating an average ratio for delivery speed because words

whose recognition score is less than a lower threshold may not be accurately recognized, and thus, may not yield a good indication of the delivery speed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Martin Lerner whose telephone number is (571) 272-7608. The examiner can normally be reached on 8:30 AM to 6:00 PM Monday to Thursday.
